

## ON LINE TRAINING EVENT

Task Force 2.1 Preventive Career Education

March 25<sup>th</sup> 2022

9.00 a.m. - 5.00 p.m

*Implementing career education programs from early childhood is essential to offer opportunities for all children to envision positive career paths, stimulating their understanding and acquisition of resources crucial for career planning. This training event is aimed at offering an overview of the most recent and accredited theoretical frameworks in the field of career guidance, together with some practical examples and new tools to be applied in the different educational frameworks for the benefit of children and young people.*

### Session 1. Early Career Education: a practical guide to developing a guidance project in primary education

- |             |                                                                                                                                                                                                                                                                    |
