## Subject Index

Entries also listed in the Glossary are marked "G".

- Absolute pitch 46–47, G  
Accidentals, tonal function of 64, 73  
Acoustically based theories of harmony 6–11  
Acquired versus innate perception 30, 31, 48  
Adjacent half-steps 72  
Affective judgment and consonance 57  
Affinity of tones in musical intervals 60  
Algorithm 77, 80, G  
Ambiguity in perception 32–33  
Ambiguity of pitch  
– in calculated pitch analyses 142–146  
– of complex tones 38–39, 42  
– and multiplicity 32, 93, 138  
– in pitch analysis experiment 111  
– of root of chord 70, 75, 148–150  
Amplitude modulation 7, 9  
– and roughness 58–59  
Analysis of pieces 162–165  
Analytical perception 30, 32, G  
– of complex tones 34  
– and free parameters in model 79, 99  
Applications of the model 135–166  
Atonality 6, 9  
Audibility G  
– of complex tone components 90  
– of harmonics in complex tones 88, 89, 135–137  
– of pure tone components 88  
– and salience, pitch weight 143  
– of tone components (pure or complex) 91  
Audible level 88, G  
Audiogram 87  
Auditory image 35, 54  
Auditory level 82–85, G  
  
Basilar membrane 26–27, G  
Basse fondamentale 16, 34  
Beats 7, 9, G  
– and roughness 58–59  
Bells, spectra of 102, 111, G  
–, familiarity with 111, 132  
  
Black box view of model 78  
Brain and philosophy of perception 19  
Brainwashing versus sensitization 50  
Breathing and musical phrasing 53  
  
Carrier frequency 58, G  
Categorical perception 29–30, G  
– in music 23  
– of pitch, *see* Pitch category  
Chord progressions 5, 75–76, G  
–, tonality of 155–165  
Chords 2–4, G  
–, consonance of 57, 141–142  
– in experiments 102, 130  
–, pairs of 4–5  
–, pitch commonality of 151–153  
–, pitch distance between 154–155  
Chroma 3, G  
–, calculated saliences of, in chords 146–150  
– cycle 12, G  
–, numerical labels for 81  
– salience (tally, probability) 94, G  
–, tonic 68  
Chromatic scale 62–65, G  
– in model 45, 79, 81  
Circle of fifths, *see* Cycle of fifths  
Clang pitch 33  
Closure and streaming 41  
Cognitive structures  
– of pitch 42  
– of tonality 12–13, 158–161  
Colour, perception of 29  
Combination tones 7, 10, 27, G  
Complex tone (harmonic) 17, G  
–, audibility of 90  
– in experiments 102, 117–118, 123  
–, perception of 33–40, 49, 54  
–, specification of, in model 83–84  
Complex tone sensation 33–40, G  
– in early life 54  
– and harmonic template 89  
– at high frequencies 137–138  
– and root of chord 70  
  
Composition 165–166  
Computers  
– and brains 19  
– and model 78  
Conditioning 48–56, G  
– in experiments 99–100  
Confidence interval 98, G  
Consecutive octaves and fifths 4, 151  
Consonance 56–61, G  
– of chord progressions 75  
– of dyads and chords 141–142  
– and tonality 155–156  
Context G  
– and ambiguity, multiplicity 32  
– and consonance 56  
– and pitch ambiguity of tones 38–40  
Contour, melodic 51, 53, G  
Corps sonore 16  
Counterpoint  
– and chord progression 75  
– and pitch distance 61  
– and streaming 42, 138–139  
–, two-part 141  
Critical-band rate 86, G  
Critical bands and roughness 58–59  
Critical bandwidth 85–87, 136, G  
Crossing parts in counterpoint 154  
Cultural aspects  
– of chromatic scale 63  
– of model 79  
– of Western tonality 6, 157, 165  
Cultural components of consonance 58  
Cultural conditioning 48–50, G  
Cultural effects in experiments 99, 122  
Cyclic group 15  
Cycle of fifths 4, G  
– and chromatic scale 63  
– and pitch commonality 61  
  
Diatonic scales G  
– and harmonic relationship 4  
– and pitch commonality 61  
–, tonics of 71–72  
Difference threshold G  
– for complex tones 43  
– and perceptual categories 30  
– for pure tones 27, 43  
Difference tones 10, 27  
Dimensionality of pitch 42  
Direct perception 22–23  
– of complex tones 89  
– and environmental interaction 20  
– and pattern recognition 30–31  
  
Dissonance  
– and beats, roughness 9, 58–60  
– and major/minor 75  
– and musical preference 57–58  
Distortion, auditory harmonic 27, G  
Dominance region of spectral pitch, *see* Spectral dominance  
Dominant-tonic progression 4, 5, G  
– and pitch commonality 153  
– and tonality 71  
Doubling of notes in chords 3, G  
– effect on consonance 142  
Dualism  
–, harmonic (major/minor) 69  
–, psychophysical (mind/brain) 21  
Dyads G  
–, pitch commonality of 151  
–, pitch distance between 154  
–, roots of 148  
Dynamics and loudness 23  
  
Ecological model of perception, *see* Direct perception  
Echoic memory 28  
Emotion  
– and major/minor 73–75  
– in speech and music 53, 55  
Enharmonic spelling G  
– and frequency ratios 7  
– and pitch categories in model 81  
Equal temperament 63, G  
– and intonation 65–66  
–, microtonal 64  
– in model 81  
Experience, and philosophy of perception 11, 20–24  
Experiments 98–134  
–, modelling of 81–82, 96–97  
Evolution, survival, and music 55–56  
  
Familiarity  
– with bell sounds 111  
– and consonance 56  
– with harmonic pitch patterns 9, 36  
– and music perception generally 49  
– of musical intervals 122  
– with musical scales and tunings 44  
– and pattern recognition 31  
– and streaming 41  
Fast Fourier transform (FFT) 80, G  
Footsteps and rhythm 51–53  
Fourier analysis, *see* Spectral analysis  
Fourier-*t*-transform (FTT) 27  
– and masking 88  
– and tone perception 34

- Frequency, in model 82, G
- Frequency level 44, G
  - in model 81–82
- Frequency ratios and musical intervals 7
- Generative grammar 13–14
- Global perception 30
- Gradient
  - of masking pattern 27, 87
  - of spectral envelope of tones 84, 102, 117, 123
- Grouping, perceptual 31
  - in chord progressions 75
- Groups, mathematical 15–16
- Hardware, computer, and brain 19
- Harmonic complex tone, *see* Complex tone
- Harmonic relationship 4, G
  - and similarity of sequential tones 113, 116, 121
  - and tonality 155–156
- Harmonic series 8–9, G
  - in model 84, 89–90
  - and root of chord 69
- Harmonicity of pure tone components G
  - and complex tone perception 44, 64
  - and periodicity 10–11
- Harmonics G
  - , number audible, in complex tones 88, 89, 135–137
- Harmony G
  - and physics 6–10
  - and prenatal conditioning 51–54
  - and psychophysics 16–17
  - of the spheres 7
- Hearing out of harmonics 34, G
- Heartbeat and rhythm 51–53
- Heptatonic scale, standard 5, 65, G
  - intonation of 66
- Hierarchy of pitch 13–14
- Hocket and streaming 41
- Holistic perception 30, G
  - and ambiguity 32
  - of complex tones 35
  - and multiplicity 92, 93
- Homorhythmic progression 75, G
- Identity, perceptual 31
  - in experiment 119
- Improvisation 24
- Infants in music perception experiments 39, 54
- Information
  - capacity 65
  - flow and consonance 57
- and perceptual categories 44
- perceptual extraction of 29–33
- and philosophy of perception 20–24
- Innate versus acquired perception 30–31, 48
- Interval classes, roots of 148
- Interval stretch and pitch shift 67
- Intervals G
  - , consonance of 56
  - , familiarity and frequency of occurrence of 122
  - , nature and recognition of 44–45
  - , origin of 7–11, 15–16, 35–39
  - , pitch commonality of (pairs of) 151
  - , pitch distance between pairs of 154
  - , rising versus falling 114–115, 119–122
- Intonation in music 65–67, G
  - and pitch categories 44
  - and roughness 64
  - and timbre 26
- Intonation in speech 53
- Inversion of chords 3, 149, G
- Jazz, harmonic analysis of 163–164
- Just noticeable difference, *see* Difference threshold
- Just tuning and intonation 7, 65–66, G
- Key, musical 5, 68, G
  - , calculated 158–161
- Key relationship
  - in analyzed pieces 163–165
  - and key signature 61, 73
  - , model of 12, 161
- Leading note 8, G
  - , tonal function of 72, 74
- Linguistics and music theory 14
- Loudness 24–25, 43, G
- Low pitch 33
- Major/minor and happy/sad 73–75
- Masked threshold 27, 82, G
- Masking G
  - model of 85–88
  - and number of audible harmonics 135–137
- Meaning
  - of chords in context 70
  - of music 55
- Mel scale 13, 43, 87
- Melodic relationship 4, G
- Melody recognition and recall
  - and contour 53
  - and diatonic structure 54, 73

- and octave equivalence 39, 62
- Memory 28
- Microtones 8, 64, G
- Minor triad
  - , calculated pitch analyses of 143, 148
  - , distortion of major 69, 160
  - , root of 8, 69
- Model 77–97
- Modelling experiments 99, 132–133
- Modes 5, G
  - , evolution to major/minor scales 71
- Modulation (key change) 5, G
  - and key relationship 61, 73, 161
- Modulation, amplitude (beating) 7, 9, G
  - and roughness 58–59
- Multidimensional map of key relationships 161
- Multidimensional model of pitch 12–13, 42
- Multidimensional scaling 12–13, G
- Multiplicity 32
  - experiment 100–105
  - model 92
  - , music-theoretical calculations of 138–139
- Musicians versus non-musicians in experiments 45, 134
- Nature/nurture 48
- Noise, pitch of 34, G
- Notes versus tones 23, G
- Noticing and salience 29, G
- Octave equivalence and similarity 3, 61–62, G
  - in calculated pitch analyses 143
  - in experiments 115, 125, 134
  - between pure tones 39
- Octave stretch 40, G
  - and intonation 67
  - in model 81
- Octave-spaced tone G
  - in experiments 102, 111, 123, 128
  - and helical model of pitch 12
  - in model 84–85, 146
  - in music-theoretical calculations 143, 146, 151, 156, 158
- Onset asynchrony in chords 93
- Orchestration and timbre 23
- Organum 4, G
  - and parallel octaves and fifths 151
- Origins of music 55–56
- Parallel octaves and fifths 4, 151, G
- Parameters
  - , free 79, 99, G
- , masking 87
- , (pure/complex) tone perception 90
- , relationship perception (pitch commonality/distance) 97
- , simultaneity perception (multiplicity) 93
- Pattern recognition 30–32
  - in model 89–90
  - and root of chord 70
- Pentatonic scale, standard 65, G
- Percepts versus sensations 30
- Perceptual learning 19
- Perfect pitch 46–47, G
  - in experiments 103
- Periodicity G
  - and musical intervals 10–11
  - and pitch 33, 35
- Philosophy of perception 19–24
- Phon (unit of loudness level) 25
- Phonic theory of reinforced resonance 69
- Phrasing and breathing 53
- Physically based theories of harmony 6–11
- Pieces of music
  - , analysis of 162–165
  - , composition of 165–166
- Pitch G
  - of complex tones 35–39
  - , definition of 33
  - , musical 61–67
  - , musical, at high frequencies 37–38
  - , perception of 42–47
  - , place versus temporal theory of 26
  - of pure tones 34–35, 39–40
- Pitch analyses, calculated 142–146
- Pitch analysis experiment 105–113
  - , modelling of 96
- Pitch category 44–45, G
  - in experiments 122, 127
  - in model 80, 81, 84
- Pitch class, *see* Chroma
- Pitch commonality 60–61, G
  - in experiments 115, 119, 122, 132
  - in model 94–96
  - , music-theoretical calculations of 150–154
- Pitch distance/proximity 40, 60–61, G
  - and consonance 58
  - in experiments 110, 116, 119, 121, 132
  - and intonation 67
  - in model 95–97
  - , music-theoretical calculations of 154–155
- Pitch-matching experiment 105
- Pitch proximity, *see* Pitch distance
- Pitch shift 35, 37, G
  - and intonation 66–67

- in model 80
  - in pitch analysis experiment 110
  - Polyphony, *see* Counterpoint
  - Power law of psychophysics 92
  - Precategorical acoustic storage 28
  - Preference and consonance 57, G
  - Prenatal conditioning 50–56
  - Pressure amplitude (in model) 82, G
  - Probe tones G
    - octave-spaced 12, 158
    - pure 105–108
  - Profile, tone/key 12, 158–161, G
  - Prominence of pitch of pure tone 88
  - Proximity
    - perceptual 31
    - pitch, *see* Pitch distance
  - Psychoacoustics 16–47, G
  - Psycholinguistics 14
  - Psychologically based theories of harmony 11–16
  - Psychophysics 16–47, G
  - Pure tone G
    - audibility versus salience of 91
    - in similarity experiment 117, 119
    - specification in model 83
  - Pure tone height 86–87, G
  - Pure tone sensation 33–35, G
    - and harmonic template 89
    - at high frequencies 138
    - pitch shift of 35, 37, 66–67
  - Pure tuning and intonation 7, 65–66
  - Pythagorean tuning and intonation 7, 65–66, G
- Quartertones, *see* Microtones
- Rating scale, experimental 101, 118, G
  - Register, octave 81, G
  - Residue pitch 33, 35, G
    - from unresolved harmonics 137
  - Residue tone 10, G
    - in experiment 128
    - sensation 110
  - Resolution, musical
    - of dissonant chords 129–130
    - of melodic leaps 42
    - of sevenths onto triads 153–155
  - Resolution, spectral, of ear 27
  - Response categories, experimental 101, 118
  - Results, general experimental 98–99, 132–133
  - Rhythm and footsteps/heartbeat 51–52
  - Ritardando and footsteps 52
  - Root of chord 5, G
    - and basse fondamentale 16
  - music-theoretical calculations of 146–150
  - nature and origin of 68–70
  - of sequential tones 71, 155–156
  - and tonic of diatonic scale 71–72
- Rubato and heartbeat 52, G
- Salience 29, G
    - and audibility, pitch weight 143
    - of complex tone sensations 35, 37
    - in model 80, 92–94
    - in pitch analysis experiment 105–106, 112
    - of sharps versus flats 73
  - Scale (pitch) G
    - categorical (musical) 44–45
    - chromatic 62
    - continuous (psychoacoustical) 43–44
    - implied 158
    - origin of major/minor 71, 149
    - tonic of 70–73
  - Sensations G
    - and percepts 30
    - and philosophy of perception 20–24
  - Sensitization versus brainwashing 50
  - Sensory aspects of model 79
  - Sensory basis
    - of chromatic scale 63
    - of Western tonality 6, 157, 165
  - Sensory components of consonance 58
  - Sensory conditioning 48–50, G
    - “indirectly” 58, 99, 122
  - Sensory effects in experiments 99, 122
  - Sensory memory 28, 76
  - Sets, mathematical 15
  - Seventh chords 2, G
    - roots of 149
  - Sharps and flats, tonal function of 64, 73
  - Shepard tone, *see* Octave-spaced tone
  - Sight reading 24
  - Significance, statistical, in experiments 98–99, G
  - Similarity experiments 113–132
    - modelling of 97
  - Simultaneities G
    - analysis by model 135–150
  - Software, computer, and perception 19
  - Sone (unit of loudness) 25, 43
  - Sonority/sonorousness, *see* Tonality
  - Sound pressure level (SPL) G
    - excess 88
    - of experimental sounds 102, 109, 114, 118
    - gradients in complex tones 84
    - in model 81–82

- Spacing of tones in chords 3
    - and consonance 142
  - Spectral analysis, auditory 26–27, G
    - and conditioning 49
    - in model 80
  - Spectral dominance 37, 137–138, G
    - in model 83–84, 91
    - in multiplicity experiment 105
  - Spectral pitch 33–34, G
    - and harmonic template 89
    - pattern 34
    - shift 35, 37, 66–67
  - Speech
    - and basse fondamentale 17
    - and emotion 74
    - and prenatal conditioning 51–54
  - Stimulus and sensation 21, G
  - Streaming, melodic 31, 40–42, G
    - and multiplicity 138–139
    - and prenatal conditioning 51
  - Subharmonic pitches G
    - and chord roots 69
    - of pure tones 39–40, 142
  - Survival, evolution, and music 55–56
- t* test 98
- Template
    - diatonic 37, 73
    - harmonic 36, 89, 137
    - and key profile 158–161
  - Template matching and pattern recognition 31
  - Tetrads 2, G
    - roots of 149
  - Therapy, music 55
  - Three worlds (philosophy of perception) 20–24
  - Threshold G
    - of audibility 82, G
    - difference, *see* Difference threshold
    - level 82, G
    - of pitch 84, G
  - Timbre 24–26, G
    - of 'cello, clarinet 59
    - role in similarity experiments 116, 121
    - and roughness 59
    - and “singing tone” 60
    - streaming by 40
  - Time constant of hearing 27
  - Tonal relationship 4, G
  - Tonality 68–76, G
    - and consonance 58
  - and key profiles 158–161
  - psychoacoustical prediction of 155–157
  - sensory basis of 5–6, 157, 165
- Tonality 25, 59, G
  - in analysis and composition 162–166
  - complex 92, G
  - dependence on level 88
  - music-theoretical calculation of 139–142
  - pure 91, G
- Tone
  - versus note 23–24, G
  - pitch 33
  - profile 12
  - quality, *see* Timbre
  - sensation 33–42, G
- Tonic 5, 68, G
  - ambiguity of, in minor key 75, 160
  - of a diatonic scale 70–73
  - as implied triad or scale 157–158
  - as key 158–162
- Training, musical 45
- Triads 2, G
  - implied, as tonics 157
  - pitch commonality of 151–153
  - roots of 148
  - similarity of 129
- Trials, experimental 98, G
- Tristan chord, pitch analysis of 146
- Tritone G
  - instability of 71–72
  - rareness of 73
- Tuning 7, 65–66, G
- Twelve-tone music 6, G
- Undertones, harmonic 69
- Vibrato and streaming 41
- Virtual pitch G, *see* Complex tone sensation
- Voice, *see* Speech
- Voice leading 4, G
  - and pitch distance 61
  - and similarity of chords 131
- Voicing of chords 3, G
- Walking and rhythm 51–53
- Waveform 7, 23, G
  - periodicity of 10
  - sawtooth/rectangular 117
- Weight
  - of harmonic template elements 89
  - pitch 80, 106, 112, 143
  - spectral pitch 88
