01 **Clock Tower**

The fortified medieval tower got its present shape around 1560. Three bells ring from the Clock Tower and three coats of arms decorate the walls.

02 **Gemaltes Haus**

Strolling through Herrengasse, you can take a look at the impressive front. In 1742 the Baroque artist Johann Mayer painted frescos on the façade which depicts gods from Greco-Roman mythology.

03 **Murinsel**

What was meant to be a temporary project when Graz was honored as Cultural Capital of Europe in 2003, turned into a permanent attraction. The New York artist Vito Acconci designed a steel grid structure in the shape of a half-opened shell. The island also functions as a bridge between the two banks of the river Mur.

04 **Kunsthaus Graz**

Like a huge bluish bubble, one of the newer landmarks of Graz towers above the right bank of the river Mur. Since October 2003 the Kunsthaus – affectionately called "friendly alien" - has attracted people through its spectacular architecture and changing exhibitions of contemporary art.

05 **Glockenspiel**

Three times a day locals and tourists gather for a nice spectacle at Glockenspielplatz. The Graz carillon chimes three melodies, while, in the gable windows of the building, a wooden couple in proper costume dances to the sound. If you miss this spectacle at 11 am, come back at 3 or 6 pm.

06 **Opera House**

It is the second largest opera house in Austria. In 2001, it won the award for "Opera House of the Year". The building was erected in 1899 by the architects Fellner and Helmer, who planned buildings all over Europe.
