RESEARCH PROFILE

Linguist working at the semantics-pragmatics-grammar interface, with a particular focus on questions and question-under-discussion structure, information and discourse structure, indefinites and exhaustivity, anaphora and discourse-reference management, argument structure, narrative suspense, and political discourse. The research combines formal semantic and pragmatic theory with experimental psycholinguistics, corpus methods, and statistical/computational modelling. Founding Member of the University of Graz Field of Excellence "Complexity of Life".
