

What is Philosophy? A Jurisprudent's View

Graz Jurisprudence Lecture 2025

Prof. em. Massimo La Torre, Catanzaro

What is philosophy? This question is a core issue of philosophy itself. Answering it requires us to radically reflect on what we believe should be our way of having a reflective and general grasp of the world and its meaning. Massimo La Torre will address the question of philosophy's nature from the perspective of legal philosophy.

While the latter is only a small part of philosophy itself, it nonetheless plays a crucial part: Legal philosophy is the ground where many general philosophical assumptions are tested for their capacity to be relevant for the social conduct of human beings and for their aspiration of a secure and just community.
