

**MAG. DOMINIK ORNIG**

# "Automation of Decision-Making"

**09.01.2023**

**12:30**

HS 15.01 (Moot-Court- und  
Verhandlungsraum) and online

The cost pressures and distancing rules during the Covid-19 pandemic have added further momentum to the drive towards digitalization and automation of judicial decision-making. Unprecedented amounts of available data along with the necessary technology and computing power to process them pave the way for increasingly automated decision-making. A wide array of disruptively efficient tools is on offer ranging from assistance programmes to fully autonomous processes that do not require human intervention. Legal decision-making, however, ought to square the pursuit of many goals, only one of which is efficiency. This lecture will provide a critical overview of the currently available solution and identify trends that may shape the future of disputes.

The **GILDS** is founded and chaired by **Professor Erika De Wet**, Head of the Institute of International Law and International Relations.
