

Workshop on Phonetics at the 47th Austrian Linguistics Meeting (Graz, 08-10 December 2023)

Title: Phonetics across disciplines

Organization: Nina Weihs¹, Anneliese Kelterer², Conceição Cunha³, Eva Reinisch¹

¹Acoustics Research Institute, Austrian Academy of Sciences, Vienna, Austria

²Institute of Linguistics, University of Graz, Austria

³Institute of Phonetics and Speech Processing, Ludwig-Maximilians University of Munich, Germany

The workshop is aimed at scientists who focus on phonetic research from a theoretical, empirical or technological perspective. The goal is to bring together a large number of researchers from different departments and universities to appreciate the diversity and breadth of phonetic research in Austria and neighboring countries. We hope to discover similarities and connections between ongoing research and to build networks of people with similar interests. Young researchers are especially encouraged to present their work.

Possible topics for submissions include but are not limited to:

- Theoretical and methodological aspects
- Linguistic Interfaces (phonetics-phonology, phonetics-syntax)
- Linguistic variation and varieties
- Phonetics in first language acquisition
- Phonetics in second and foreign language acquisition
- Acoustics
- Articulation
- Perception
- Speech synthesis, speech recognition, speech technology

Abstracts: max. 300 words excluding literature and figures in English or German. Please indicate the planned language of presentation.

Deadline: 10.09.2023.

Please send abstracts per e-mail to Nina Weihs <Nina.Weih@oeaw.ac.at>

We will inform authors about acceptance of their abstract until 20 September 2023. For additional information please also check the official website of the conference
