Dupla Graecensia Fungorum (2016, Nos 351–450)

Christian SCHEUER*

SCHEUER Christian 2016: Dupla Graecensia Fungorum (2016, Nos 351–450). - Fritschiana (Graz) 82: 1–36. – ISSN 1024-0306

http://botanik.uni-graz.at/de/fritschiana/

Dupla Graecensia Fungorum is a duplicate series for the distribution of fungal collections with irregular numbers of specimens. Every institution receiving a duplicate of a collection is cited on the label.
Dupla Graecensia Fungorum (2016) is distributed to the herbaria GZU, BPI, M, WSP, HAL, NY, LI, KL, TROM, LE, KRAM, and SOMF. The four complete sets comprise 100 specimens and are deposited in GZU, BPI, M, and WSP.
Nearly all material for the present shipment was collected in Austria (Burgenland, Carinthia, Lower Austria, Styria, Vienna), with one exception from Slovenia.
The most remarkable collections are *Didymella* cf. *oudemansii*, *Entyloma corydalis*, *Lentithecium aquaticum*, *Marssonina coronariae*, *Niptera* cf. *trichophoricola* (from Slovenia), *Peronospora verbasci*, *Phyllactinia corni*, *Pirottaea* cf. *nigrostriata*, *Pseudoinonotus dryadeus* (on *Quercus macranthera*), *Puccinia agrostidis*, *P. barkhausiae-rhoeadifoliae*, *P. circaeae-caricis*, *P. ferruginosa*, *P. pedunculata*, *Ramularia hellebori*, *Spongipellis spumeus* (on *Aesculus octandra*), *Synchytrium taraxaci*, and *Uromyces erythronii*.

Dupla Graecensia Fungorum is a duplicate series for the distribution of fungal collections with irregular numbers of specimens. Every institution receiving a duplicate of a collection is cited on the label. The present shipment of the series comprises collections of various taxonomic groups, especially rust fungi. The most remarkable taxa are pointed out in the abstract (see above).

The present shipment of Dupla Graecensia Fungorum is distributed to the following institutions (official abbreviations for public herbaria according to INDEX HERBARIORUM, currently online under http://sweetgum.nybg.org/ih/). The four complete sets comprise 100 specimens and are deposited in GZU, BPI, M, and WSP.

GZU (Graz, Austria)	HAL (Halle/Saale, Germany)	TROM (Tromsø, Norway)
BPI (Beltsville Md, USA)	NY (New York, U.S.A.)	LE (St. Petersburg, Russia)
M (Munich, Germany)	LI (Linz, Austria)	KRAM (Kraków, Poland)
WSP (Pullman Wa, USA)	KL (Klagenfurt, Austria)	SOMF (Sofia, Bulgaria)

Thanks are due to all people who contributed collections, identifications and comments to this set, especially to Thomas Barta (Vienna), Stefan Bechter (Graz), Dr. Wolfgang Dämon (St. Georgen b. Salzburg), Gernot Friebes (Graz), Dr. Walter Obermayer (Graz), Mag. Detlef Heinz Prelicz (Unterpurkla), Dr. Helene Riegler-Hager (Klagenfurt), Prof. Dr. Leif Ryvarden (Oslo), Prof. Dr. Herwig Teppner (Graz), Sigrid Tielsch (Graz), and PD. Dr. Hermann Voglmayr (Vienna).

Duplum ex GZU000312272, Inv.-Nr. 56-2013

Distributed to: GZU, BPI, M, WSP

Annot.: This species may have been rare in Austria, and only two localities in Styria are cited by POELT & ZWETKO (1997: 87). However, recent observations in Graz and environs show that it might (have) become more common by infecting ornamental cultivars of its host species, e.g. *Carpinus betulus* cv. *columnaris*. In some localities whole trees appeared bright orange in late summer and autumn, due to the mass production of uredinia.
