485. *Melampsoridium carpini* (Nees) Dietel

II, III on *Carpinus betulus* L. (cultivar)

AUSTRIA, Styria, Graz, district Waltendorf, Pointnergasse, 410 m alt., 47°04'28"N, 15°29'15"E.

2 October 2014

leg. & det. Christian SCHEUER

Annot.: This species may have been rare in Austria, and only two localities in Styria are cited by POELT & ZWETKO (1997: 87). However, recent observations in Graz and environs show that it might (have) become more common by infecting ornamental cultivars of its host species, e.g. *Carpinus betulus* cv. *columnaris*. In some localities whole trees appeared bright orange in late summer and autumn, due to the mass production of uredinia.

POELT Josef(†) & ZWETKO Peter 1997: Die Rostpilze Österreichs. 2., revidierte und erweiterte Auflage des Catalogus Florae Austriae, III. Teil, Heft 1, Uredinales. - Biosystematics and Ecology Series 12: 365 pp. - Wien: Österreichische Akademie der Wissenschaften.
