The first, main part of this index (see below) refers only to fungi on ± reliably determined, uniform plant material. Species on other hosts/substrates (e.g. fungi, soil, unidentified wood, mixed plant litter) are listed separately below. Some plant names and their synonyms have been updated in accordance with FISCHER et al. (2008) or THE PLANT LIST.

- **Brackets:** DF citations and DFS or DGF numbers in brackets refer to admixed species or to hosts of fungicolous species, if necessary also to taxa mentioned in annotations.
- **Square brackets:** Current names and orthographic variants (mainly from KLENKE & SCHOLLER 2015, INDEX FUNGORUM, and MYCOBANK) given in square brackets have only been inserted during the compilation of this index.
- **Italics:** Currently accepted names are given in normal print, others in *italics*.
- **Superscript:** References to schedae emendatae are inserted in superscript ($^{I-VII}$, see above on page 2 for their full bibliographical references).
