DocDay Team:

Tanja Gerlza
Clemens Hinteregger

Time Schedule

13:00 – 13:15 **Opening by Univ.-Prof. Dr. Andreas Kungl and Univ.-Prof. Dr. Peter Scherrer (Vice-rector of research)**

13:15 – 14:00 **Plenary lecture**
Dr. Andreas Meinke (SVP, Global Head Research)
Development of a vaccine exemplified by Valneva's OspA-based multivalent Borrelia vaccine

Gerlza Tanja – In vitro profiling of chemokines and chemokine mutant interactions with glycosaminoglycans

Miriam Russ (ST) – Development of analytical methods for quantification of angiopeptides

14:00 – 15:35 **Jennifer Weiss** (ST) – Development of new identification methods for recreational drugs

Mohammed Noureldin (ST) – The explanation of the different behaviors of dihydrofolate reductase toward dihydrobiopterin in different endothelial cells types

Karin Becker – Hot melt coating - taste-masked multiparticulate drug delivery systems with immediate drug release

15:35 – 16:00 **Coffee break**

Stefanie Nikles – Metabolic Profiling of the Chinese Herbal Mixture Yu Ping Feng San and its Effects on the Expression of TNF- α in U937 Cells

Magdalena Taschwer – Analysis of tryptamines as novel designer drugs by various chromatographic and electrophoretic separation techniques

16:00 – 17:00 **Noor ul Amin Mohsin** – Synthesis, Purification and antiprotozoal activity of Piperazine derivatives of azabicyclonane

Maximilian Aigner – MAO-Biosensors: Possibilities of Enhancing the Performance

Clemens Hinteregger – Synthesis of new quinoline derivatives with basic side chains

17:00 – 17:10 **Closing remarks and award ceremony**

17:15 **Get-together**
