About Mosaic data files and their distribution

The Mosaic project distributes European historical census microdata. Every interested researcher can download data for his/her own research free of charge. The only condition is that you register as a user with the Mosaic project and cite the data properly. Please keep in mind that most data released by the Mosaic project is not representative of a region or country, especially in cases where the data stems from research concentrating on one specific settlement.

The following requirements exist for a data file to be included in the Mosaic project:

- The data source should list individual persons, preferably by name
- The data source should list all persons of a settlement or area, not only household heads, men, or adult people
- The data source should list individuals by residence units (houses, hearths, domestic groups, or households)

Characteristics that should be either given explicitly or possible to infer:

- Age
- Sex
- Relationship to household head
- Marital status
- Place of enumeration
- Year of enumeration
- (first name)
- (last name)

Harmonized Mosaic data files are distributed via the data section of the Mosaic website (http://www.censusmosaic.org/cgi-bin/index_data.plx). There is a zipped file available for each dataset, which contains three files:

- a CSV file with codes for each variable
- a CSV file with value labels for each variable
- a readme file with the citation you must use for this dataset and a short description of the dataset

The CSV file with codes for each variable can be imported into any software able to read CSV files. Scripts are available for importing CSV files into SPSS and R.

The CSV file with value labels for each variable can be used by persons who do not want to use statistical software for analyzing the data, but prefer to use a spreadsheet program like MExcel or LibreOffice.org Calc.

Note: These files use Unicode (UTF-8) for character encoding, the “.” as the decimal separator, the semicolon as delimiter of columns, and lists the variables in the first line of the file. If your software uses the “;” as the decimal separator, you have to open the CSV file with an editor and replace the “.” with “;” before importing the file.

Data checking

Basic checks have been performed to ensure that Mosaic data files do not contain obvious errors. Errors could happen at different stages of producing these data files:

- Enumeration of the census (including a possible copying of the data)
- Transcribing the census
- Coding the census

Additional problems arise from missing data or illegible data. The basic checks can only check about impossible combinations of persons' characteristics (like grandparents being younger than their grandchildren), but not about possible other errors. If there are changes made to the variables `id_hhold`, `relate`, `age`, `sex`, or `marst`, they will be flagged in the variables `qhhold`, `qrelate`, `qage`, `qsex`, and `qmarst`.

The following checks have been performed:

All values must be included in the list of acceptable values.

Every person and household needs a unique identification number.

Every household includes exactly one household head. The only exception are incomplete households.

The number of married men and women has to match each other. Mosaic census files do not include societies which allowed same-sex marriages and only a few societies which allowed polygamy.

Couples must have the correct relationship codes.

Spouses and children of the household head must be really their spouses and children and not spouses or children of other members of the household.

Age and marital status are checked for children being married.

Marital status and relationship codes have to match each other.

Age and relationship to the household head have to match each other.

Geo-referencing of places

All places are coded and geo-referenced. The table of places with their latitude and longitude will be made available in future.

Overview of variables

General overview

This file contains the documentation of the 30 harmonized variables of the Mosaic data files. These consist of variables of three different levels:

- 4 variables defining the data set,
- 8 variables defining the household, and
- 18 variables defining the person.

Variables defining the data set:

These are variables which are the same for all cases of one data set. This information is provided either as part of the form used for the enumeration, or as information on material accompanying the enumeration, or as information from other sources.

Variables defining the household:

These are variables which are the same for all persons of one household. Some of them are the same for many or even all persons of one data set (e.g. region). This information is partly provided by the enumeration form, but sometimes derived from other sources. It includes also one quality flag variable.

Variables defining the person:

These are variables which pertain to individual persons. This information is generally provided by the enumeration itself, but some variables have been constructed and added, like four quality flag variables.

The following table gives basic information about all variables:

- variable name
- variable label
- number of digits or characters
- kind of data (numeric or alphabetic data)
- origin of data (original or added data)
- comparison to IPUMS-International
- comparison to NAPP
- data level (data set, household, or person)

In general most variables are designed according to their IPUMS-International (<https://international.ipums.org/international/>) and/or NAPP (<http://www.nappdata.org/napp/citation.shtml>) counterparts and can therefore be used easily in comparative research with data from these databases.

Table 1: Harmonized variables of Mosaic data files by data level and alphabetic order

variable name	variable label	no. of digits or characters	kind of data	origin of data	IPUMS-International	NAPP	data level
country	country code	3	numeric	original or added	CNTRY: 3 digits	CNTRY: 3 digits	data set
enumtype	type of enumeration	2	numeric	added	not existing	not existing	data set
id_enum	enumeration identification number	6	numeric	added	SAMPLE: 4 digits	SAMPLE: 4 digits	data set
year	year of enumeration	4	numeric	original or added	YEAR: 4 digits	YEAR: 4 digits	data set
gq	group quarter status	1	numeric	added	GQ: 2 digits	GQ: 1 digit	household
hhsz	household size	4	numeric	computed	PERSONS: 3 digits	NUMPERHH: 4 digits	household
hhwt	household weight	4 (2 decimal places)	numeric	computed	WTHH: 8 digits (2 decimal places)	HHWT: 4 digits	household
id_hhold	household identification number	14	numeric	computed	SERIAL: 10 digits (identification within sample)	SERIAL: 10 digits (identification within sample)	household
place	place code	15	numeric	original or added	many different variables	many different variables	household
qhhold	quality flag household	1	numeric	quality flag	not existing	not existing	household
region	region	6	numeric	original or added	many different variables	many different variables	household
urban	urban-rural status	1	numeric	added	URBAN: 1 digit	URBAN: 1 digit	household
age	age	3	numeric	original	AGE: 3 digits	AGE: 3 digits	person
fname	first name	32	alphabetic	original	not existing	NAMEFRST: 32 characters	person
id_pers	person identification number	15	numeric	computed	SAMPLE + SERIAL + PERNUM	SAMPLE + SERIAL + PERNUM	person

lit	literacy	1	numeric	original	LIT: 1 digit	LIT: 1 digit	person
lname	last name	32	alphabetic	original or added	not existing	NAMELAST: 32 characters	person
marst	marital status	1	numeric	original or added	MARST: 3 digits	MARST: 1 digit	person
occhisco	occupational code in OCCHISCO	5	numeric	coded	OCCISCO: 2 digits	OCCHISCO: 5 digits	person
occupat	occupational title	30	alphabetic	original	not existing	OCCSTRNG: 30 characters	person
perwt	person weight	4 (2 decimal places)	numeric	computed	WTPER: 8 digits (2 decimal places)	PERWT: 4 digits	person
presence	presence of person at enumeration	1	numeric	original	RESIDENT: 1 digit	RESIDENT: 1 digit	person
qage	quality flag age	1	numeric	quality flag	not existing	QAGEGB	person
qmarst	quality flag marital status	1	numeric	quality flag	not existing	QMARSTGB	person
qrelate	quality flag household relationship code	1	numeric	quality flag	not existing	GRELGB	person
qsex	quality flag sex	1	numeric	quality flag	not existing	QSEXGB	person
relate	relationship to household head	4	numeric	coded	RELATE: 4 digits, ERELATE: 2 digits	RELATE: 4 digits, RELATEI: 4 digits	person
relateor	relationship to household head original	45	alphabetic	original	not existing	not existing	person
relig	religion	4	numeric	original or added	RELIG: 4 digits	RELIGION: 4 digits	person
sex	sex	1	numeric	original or added	SEX: 1 digit	SEX: 1 digit	person

Table 2: Order of harmonized variables in Mosaic data files

number	variable	range of column numbers	number of columns
1	id_enum	1-6	6
2	country	7-9	3
3	year	10-13	4
4	enumtype	14-15	2
5	id_pers	16-30	15
6	id_hhold	31-44	14
7	qhhold	45	1
8	fname	46-77	32
9	lname	78-109	32
10	relateor	110-154	45
11	relate	156-158	4
12	qrelate	159	1
13	age	160-162	3
14	qage	163	1
15	sex	164	1
16	qsex	165	1
17	marst	166	1
18	qmarst	167	1
19	relig	168-171	4
20	lit	172	1
21	occupat	173-202	30
22	occhisco	203-207	5
23	hhsiz	208-211	4
24	place	212-226	15
25	region	227-232	6
26	perwt	233-236	4
27	hhwt	237-240	4
28	gq	241	1
29	urban	242	1
30	presence	243	1

Variable description in alphabetic order

age (age)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable has the age in years of the person. Fractions of years are omitted. There is no distinction made between years at last birthday or at next birthday, the data is in this variable as recorded in the source. If the year of birth is recorded in the source material, the age will be calculated by subtracting the year of birth from the year of enumeration, not taking into account the day of enumeration within the year. The maximum age allowed is 125 years, all ages above will be recoded to 125 years (and the quality flag qage will be recoded, too). This is in accordance with NAPP. It is a numeric variable with 3 digits.

codes:

0	less than 1 year old
131	nursing
132	weaned
133	child
134	adolescent
135	adult
136	old
999	unknown

comparability:

This variable is fully comparable across all data sets. The codes are the same as the variable AGE in NAPP.

country code (country)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable identifies the country of the data set. This is generally the country to which the place of enumeration belongs today. Exceptions are cases where the place belongs now to a different country, but was part of a larger enumeration.

It is a numeric variable with 3 digits. The codes assigned to each country are those used by the UN Statistics Division and the ISO (International Organization for Standardization). ISO 3166-1 (http://en.wikipedia.org/wiki/ISO_3166-1) has the current codes and ISO 3166-3 (http://en.wikipedia.org/wiki/ISO_3166-3) has the codes for countries which have been deleted from ISO 3166-1.

codes:

008	Albania
020	Andorra
040	Austria
056	Belgium
070	Bosnia and Herzegovina
100	Bulgaria
112	Belarus
156	China
191	Croatia
196	Cyprus
200	Czechoslovakia
203	Czech Republic
208	Denmark
233	Estonia
234	Feroe-Islands
246	Finland
250	France
276	Germany
300	Greece
336	Vatican
348	Hungary
352	Iceland
368	Iraq
372	Ireland
380	Italy
428	Latvia
438	Liechtenstein
440	Lithuania
442	Luxembourg
470	Malta
492	Monaco

498	Moldavia
499	Montenegro
528	Netherlands
578	Norway
616	Poland
620	Portugal
642	Romania
643	Russia
688	Serbia
703	Slovakia
705	Slovenia
724	Spain
752	Sweden
756	Switzerland
792	Turkey
804	Ukraine
807	Macedonia
810	USSR
818	Egypt
826	United Kingdom
891	Yugoslavia
999	unknown

comparability:

This variable is fully comparable across all data sets. It uses the same codes as the variable CENTRY of NAPP and IPUMS-International.

enumeration identification number (id_enum)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable is the identifier of each enumeration within the whole data collection. It is a numeric variable with 6 digits. The first 3 digits indicate the country and the last 3 digits the enumeration within the country. The country is here the country which made the enumeration.

codes:

040001	Austria 1857 census
040002	Austria-Hungary 1869 census
040003	Austria-Hungary 1880 census
040004	Austria-Hungary 1890 census
040005	Austria-Hungary 1900 census
040006	Austria-Hungary 1910 census

756101	Switzerland church listings
792001	Istanbul 1885 census
792002	Istanbul 1907 census

comparability:

This variable is fully comparable across all data sets.

first name (fname)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable has the first name of the person. If there is more than one name, all of them are listed. If the first name of the person is not listed or illegible, it will receive a code (see below). If first names are not included in the data file, because this field was omitted during data entry for some reason, this variable will be filled with a code (see below). It is an alphabetic variable with 32 characters. If the information needs more than 32 characters, it is truncated.

codes:

!! missing first name

** first name not included in data file

?? illegible first name

comparability:

This variable is fully comparable across all data sets. It has the same length as the variable NAMEFRST in NAPP.

group quarter status (gq)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable classifies all housing units as falling into one of two broad categories: households and group quarters. Group quarters are largely institutions and other group living arrangements, such as rooming houses and military barracks.

Housing units are given one of four codes combining the IPUMS and British rules for identifying group quarters.

The British rules for identifying group quarters are that the household has 12 or more people, and the ratio of people unrelated to the head to total household size is > 0.8 .

Housing units with a total of ten or fewer people are always categorized as regular households (GQ=1 or GQ=2).

Housing units of 11 people are categorized as group quarters only when all residents are unrelated to the head. Once a unit has more than 10 people unrelated to the head, it will always be a group quarter under the NAPP definition. Its classification under the British definition depends on the ratio - not the total number - of unrelated members. Thus housing units with large numbers of unrelated individuals may not be group quarters under the British rule if the ratio of unrelated to total members of the housing unit falls below 0.8.

This variable is constructed automatically. It is a numeric variable with 1 digit.

codes:

- 1 Household with 0-4 persons unrelated to the head
- 2 Household with 5-9 persons unrelated to the head
- 5 Households with 10 or more persons unrelated to the head, and group quarters under British rule
- 6 Households with 10 or more persons unrelated to the head, but not group quarters under British rule
- 9 unknown

comparability:

This variable is fully comparable across all data sets. This variable has the same codes as the variable GQ in NAPP.

household identification number (id_hhold)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable is the unique household identifier within the whole data collection. It consists of the household identification number within the respective data set and the dataset number. It is a numeric variable with 14 digits: 3 digits for the dataset number and 11 digits for the identification number within the respective data set.

codes:

No codes are used.

comparability:

This variable is fully comparable across all data sets.

household size (hhsiz)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable has the household size or the number of person records in the household. It is a numeric variable with 4 digits. This information is sometimes available in the source material, but only the constructed variable will be used (number of persons with the same household id). This household size includes all persons enumerated in the census including absent people.

codes:

No codes are used.

comparability:

This variable is fully comparable across all data sets. This variable has the same length as the variable NUMPERHH of NAPP.

household weight (hhwt)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable indicates how many households in the population are represented by a given household in the data set. It is necessary to apply this variable to produce accurate statistics for the "weighted" samples, specifically in those where the household records in the sample data represent differing numbers of households in the population. Most of the data sets are not weighted, i.e. they have the weight "1". It is a numeric variable with 4 digits (2 decimal places).

codes:

No codes are used.

comparability:

This variable is fully comparable across all data sets. This variable has the same length as the variable HHWT of NAPP.

last name (lname)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable has the last names (or family names) of the person. If a relative of the household head (codes 201 – 1061 in the variable relate) has no last name recorded in the source, it will be added the household head's last name. Exemptions are cases of parent-child-groups within the household, where the father or mother has a last name different from the one of the household head. Children of these parents without last names will be added these parents' names and not the name of the household head.

Non-relatives (codes 1100 – 1303 in the variable relate) without own last name will get the last name of a previous relative (e.g. last names of a person with code 1141 will also be used for persons with codes 1142 – 1146, the same applies to codes 1206 – 1207, 1219, 1302) otherwise it will have the code for "missing last name". If the last name of the person is illegible, it will receive a code (see below). If last names are not included in the data file, because this field was omitted during data entry for some reason, this variable will be filled with a code (see below). It is an alphabetic variable with 32 characters. If the information needs more than 32 characters, it is truncated.

codes:

- !! missing last name
- ** last name not included in data file
- ?? illegible last name

comparability:

This variable is fully comparable across all data sets. It has the same length as the variable NAMELAST in NAPP.

literacy (lit)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable has the literacy of the person. It is a numeric variable with 1 digit.

codes:

- 0 not recorded
- 1 illiterate
- 2 can't read, can write
- 3 can't write, can read
- 4 literate
- 9 unknown

comparability:

This variable is fully comparable across all data sets. The codes are the same as for the variable LIT in NAPP.

marital status (marst)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable has the marital status of the person. It is a numeric variable with 1 digit. This information is not always explicitly stated in the source material, but deduced from the relationship to the household head.

codes:

- 1 married, spouse present
- 2 married, spouse absent
- 3 separated
- 4 divorced
- 5 widowed
- 6 never married/single
- 7 unmarried union
- 9 indeterminate/unknown, blank, or missing

comparability:

This variable is fully comparable across all data sets. The codes are the same as the variable MARST in NAPP, with the exception of code 7, which is an additional code.

coding instructions:

If a person has no information about its marital status, it will receive the code 6 for “never married” for ages 0 – 20 years and the code 9 for “unknown” for older persons. If a person is listed as “widow” in the column “relateor” and “married” in the column marital status, she will be coded as “widowed” in the variable “marst” in case no husband is listed in the household. She will get the code “1” in the variable “quality flag marital status”.

If a woman is listed as “daughter-in-law”, but being unmarried and having a different last name than the household head, she will be coded as “unmarried union”. The same code will be applied to her presumed partner (if present). Both will get the code “1” in the variable “quality flag marital status”.

If in a couple both are reported as being widowed, but the wife is reported as “his wife”, both will be coded as “married, spouse present” and the variable qmarst will be coded “1”.

If in a couple both are reported as being unmarried, but the wife is reported as “his wife”, both will be coded as “unmarried union” and the variable qmarst will be coded “1”.

occupational code in OCCHISCO (occhisco)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable has the occupational coding of the person. It is a numeric variable with 5 digits using the OCCHISCO classification, which is used by NAPP and based on the HISCO classification.

codes:

0	not coded yet
01100	Chemists
01200	Physicists
01300	Physical scientists nec
01400	Physical science assistants and technicians
02000	Professional engineers, specialisation unknown
02100	Architects
02200	Civil engineers
02300	Electrical engineers
02410	Mechanical engineers, general or nfs
02420	Industrial machinery or tools engineers
02430	Mechanical engineer (motors and engines, except marine)
02440	Marine engineers
02450	Ship construction engineers
02460	Heating, ventilation and refrigeration engineers
02490	Other mechanical engineers
02500	Chemical engineers
02600	Metallurgists and assayers
02700	Mining engineers
02800	Industrial engineers
02900	Professional engineers nec
03010	Surveyors, general and nfs
03020	Land surveyors
03030	Mine surveyors
03040	Hydrographic surveyors
03090	Other surveyors
03100	Draughtsmen
03210	Technicians
03220	Civil engineering technicians
03230	Electrical engineering technicians
03240	Mechanical engineering technicians
03250	Chemical engineering technicals
03260	Metallurgical technicians
03270	Mining technicians
03290	Engineering technicians nec
04200	Ship's deck officer or pilot

04210 Ships officers nfs
 04220 Ship's masters and captains (sea)
 04230 Ship's masters and captains (sea or inland waterways)
 04240 Ship's masters and captains (inland waterways)
 04250 Ship's navigating officers and ship's mates
 04260 Ship and boat pilots
 04270 Marine superintendents (deck)
 04290 Other ship deck officers and pilots
 04300 Ship's engineers
 05100 Biologists, botanists, zoologists and related scientists
 05200 Medical scientists
 05300 Agronomists and related scientists
 05400 Life sciences technicians
 06110 Medical doctors and physicians (UK: Medical doctors only)
 06130 Surgeons
 06140 Specialised physicians
 06150 Specialised surgeons
 06160 Public health physicians
 06170 Oculist
 06190 Medical doctors, nec
 06200 Dentists
 06300 Veterinarians
 06400 Pharmacists
 06500 Medical and related assistants
 07110 Trained nurses
 07210 Nurses nfs
 07220 Medical nurses, untrained or level of training unknown
 07320 Midwives
 07330 Monthly nurses
 07500 Opticians and optometrists
 07600 Healers and therapists nec
 07920 Osteopaths
 07930 Chiropractors
 07940 Sanitarians
 07990 Other Medical, Dental, Veterinary and Related Workers
 08000 Mathematicians and actuaries, etc.
 09000 Economists
 11010 Accountants
 11020 Auditors
 11090 Accountants nec
 12110 Lawyers
 12120 Barristers
 12130 Solicitors
 12200 Judge
 12220 Justice of the Peace
 12300 Notary
 12900 Jurists (except Lawyer, Judge or Solicitor)
 13100 Teachers in higher education
 13210 Teachers (unspecified)
 13220 Teachers (secondary)

13230 Teachers (primary)
13240 Teachers (pre-primary)
13250 Teachers (of the disabled)
13300 School administrators and principals
13920 Governesses
13990 Other teaching personnel
14120 Ministers of religion
14130 Missionaries
14140 Members of religious orders
14190 Other ministers of religion
14900 Workers in religion nec
15100 Authors
15220 Editors
15230 Journalists, reporters and correspondents
15900 Others writers
16110 Artists nfs and art teachers
16120 Sculptors
16130 Artistic Painters
16140 Cartoonists
16150 Engravers and etchers (artistic)
16190 Other specified creative artists
16200 Designers
16300 Photographers
16400 Engravers
17120 Musical performers and musicians nfs
17130 Music teachers
17190 Others in music
17200 Dancers and dancing teachers
17300 Actors and related workers
17400 Producers, performing arts
17900 Performing artists nec
18000 Athletes, sportsmen and related workers
19100 Librarians, archivists and curators
19200 Social scientists and historians
19300 Social workers
19400 Personnel and occupational specialists
19500 Interpreters, translators and philologists
19920 Patent Agents
19930 Underwriters
19990 Other professional, technical and related workers nec
20100 Legislative officials and heads of government
20200 Government administrators
21110 Proprietors, nfs
21112 Executive officers, nfs (U.S. only)
21120 Manufacturers nfs
21122 Executive officers of manufacturing concerns nfs
21130 Manufacturers or proprietors of specified manufacturing concerns
21132 Executive officers of specified manufacturing concerns
21140 Proprietor, mining, quarrying, oil and natural gas extraction
21141 Oil Producer

21142 Executive officers of extractive industry
 21150 Proprietor, railway company
 21152 Executive officers of railway concerns
 21160 Proprietor, other transport and communications
 21162 Executive officer of other transport and communications
 21170 Proprietor, public utilities (i.e., water, gas, etc.)
 21172 Executive officer of public utilities
 21180 Proprietor, finance
 21182 Executive officer finance company
 21190 Other owners of large scale productive enterprises
 21192 Executive officers of other large scale productive enterprises
 21194 Publisher
 21210 Contractors nfs
 21220 Construction contractors
 21230 Builders
 21290 Other specified contractors
 21330 Capitalists
 21340 Speculators
 21390 Investors nec
 22110 Superintendents and managers nfs
 22120 Superintendents and managers, manufacturing
 22130 Superintendents and managers, mining, quarrying, etc.
 22140 Superintendents and managers, railways
 22150 Superintendents and managers, other transport and communications
 22160 Superintendents and managers, public utilities
 22170 Superintendents and managers, construction, except railway construction
 22180 Superintendents and managers, commerce
 22190 Superintendents and managers, nec
 23110 Foremen and supervisors nfs
 23120 Foremen and supervisors, manufacturing
 23130 Foremen and supervisors, mining
 23140 Foremen and supervisors, railways
 23150 Foremen and supervisors, other transport and communications
 23160 Foremen and supervisors, public utilities
 23170 Foremen and supervisors, construction, except railway construction
 23180 Foremen and supervisors, commerce
 23190 Foremen and supervisors, nec
 24100 Inspectors of manufactories, companies etc.
 31010 Civil servants, title unknown
 31020 Tax collectors
 31030 Tax assessors
 31040 Customs officers
 31050 Postmasters or postmistresses
 31060 Clerks of court and other court clerks
 31090 Government functionaries, nec
 32000 Typists, stenographers and secretaries
 33120 Bookkeepers and bookkeeping clerks
 33130 Cashiers, bank or office
 33140 Bank clerks
 33142 Bank tellers (US)

33150 Money collector
 33160 Cash desk cashier
 33170 Toll collectors
 33180 Collector (cash or account)
 33190 Bookkeeping, account and cash handling workers nec
 33210 Railway clerks (UK) and railway agents (CA/US)
 33220 Baggage agents and baggage men
 33320 Agent, water transport (principally steamship and steamboat)
 33330 Agent, land transport (non-rail)
 34000 Office machine operators
 36010 Conductors, nfs
 36020 Railway guards (UK) and Railroad Conductors (US/CAN)
 36030 Sleeping- or pullman-car attendants
 36040 Bus, tram or streetcar conductors
 36090 Transport conductors, nec
 37020 Postal, mail and telegraph clerks
 37030 Mail carriers aka Postmen (UK)
 37040 Messengers
 37050 Mail sorters
 37090 Post office, mail, and message workers nec
 38010 Tel. operator
 38020 Telephone operator
 38030 Telegraph operator
 38090 Other telephone/telegraph operators
 39000 Clerk, nfs
 39100 Stock, weight and shipping clerks
 39130 Stock records clerk
 39310 Office clerks, specialisation unknown
 39320 Correspondence clerks
 39340 Legal clerks
 39350 Insurance clerks
 39390 Other correspondence and reporting clerks
 39400 Hotel clerk or other receptionist
 39500 Library and filing clerks

59950 Errand boys and errand girls
59960 Practical Aid (Veterinary)
59990 Other Service Workers nec
61110 General farmers and farmers nfs
61115 Husbandmen or cottars
61117 Female farmer
61120 Major landowner
61220 Field crop farmers
61230 Orchardists and fruit farmers
61240 Market gardeners
61250 Nurserymen and florists
61260 Livestock farmers
61270 Dairy farmers
61280 Poultry farmers
61290 Other specialised farmers
61320 Farmer and Fisherman
61330 Cottar and Fisherman
61400 Farm managers, formen and supervisors nfs
62110 Farm workers, specialisation unknown
62113 Farmer's sons and other male relatives
62200 Farm workers (field crop and vegetables)
62300 Farm labourers, orchard and fruit farm workers
62410 Livestock workers, general or nfs
62420 Cattle workers, except specified dairy
62430 Sheep workers

62440 Pig workers
 62450 Fur-bearing animal workers
 62460 Horse workers
 62461 Grooms and horse keepers (Domestic)
 62463 Grooms and horse keepers (Not domestic)
 62470 Horse breaker
 62490 Livestock workers, nec
 62500 Farm workers (dairy)
 62600 Farm workers (poultry)
 62710 Gardeners nfs
 62711 Gardener (Domestic)
 62713 Gardener (Not domestic)
 62720 Market garden labourers
 62730 Nursery labourers
 62740 Landscape gardeners
 62790 Other nursery workers and gardeners
 62800 Farm machinery operators
 62920 Other animal workers e.g., dogs, elephants
 62930 Other plant workers e.g., gathers of herbs etc.
 62940 Groundskeepers, etc.
 62990 Others in agricultural or husbandry
 63110 Woodsmen and workers in the woods, nfs
 63120 Lumbermen, loggers and kindred workers
 63130 River drivers
 63140 Wood cutters and choppers
 63190 Others in logging and wood cutting
 63220 Foresters and wood wardens
 63230 Forestry workers
 63240 Timber cruisers
 63250 Forest fire-fighters
 63290 Other forestry workers
 64100 Fishermen
 64920 Fish farm workers
 64930 Oyster farm workers
 64940 Whale hunters
 64950 Whale or seal hunters
 64960 Seal hunters
 64970 Trappers or hunters
 64990 Other fishermen, hunters and related workers
 71120 Miners
 71130 Quarrymen
 71190 Others working in mines and quarries
 71200 Mineral or stone treaters
 71300 Well drillers, borers and related workers
 72000 Metal workers, specialisation unknown
 72100 Metal smelter and furnacemen
 72200 Metal rollers
 72300 Metal melters and reheaters, and workers in metal melting mills
 72400 Metal casters and workers in metal casting plants
 72500 Metal moulders and coremakers

72600 Metal annealers, temperers and hardeners
 72700 Metal drawers and workers in metal drawing
 72800 Metal platers and coaters
 72900 Other (specialised) metal workers
 73100 Wood treaters
 73200 Sawyers and other titled wood/sawmill operatives
 73300 Papermill machine operators and paper makers
 74000 Chemical workers, product nfs
 74100 Drug workers
 74200 Gunpowder and explosive makers
 74320 Charcoal burners
 74330 Coal gas makers
 74340 Tar makers
 74390 Other coal product makers e.g., coke
 74420 Salt makers
 74430 Alkali and soda makers
 74500 Oil mill workers
 74620 Paint and varnish makers
 74630 Dye makers
 74640 Ink, blacking, colouring, etc., makers
 74720 Tallow chandlers, candle makers and grease makers
 74730 Soap and perfume makers
 74740 Glue, size and gelatine makers
 74750 Wax and polish makers
 74920 Fertilizer and manure makers
 74930 Starch makers
 74940 Turpentine makers
 74990 Specified chemical workers nec
 75000 Textile workers, specialisation unknown
 75100 Fibre preparers
 75200 Spinners, doublers, twistors and winders
 75300 Weaving and knitting-machine setters and pattern-card preparers
 75400 Weavers
 75500 Knitters
 75600 Bleachers, dyer or textile product finisher
 75700 Rope makers
 75920 Net maker
 75990 Other specialised textile workers nec
 76110 Tanners or fellmongers, specialisation unknown
 76120 Fellmongers
 76130 Tanners
 76140 Leather curriers and finishers
 76190 Other specified leather curers
 76200 Fur and pelt dressers
 77100 Millers and related workers
 77200 Sugar refiners
 77310 Butchers
 77320 Pork butchers
 77340 Slaughterer, meat cutters or meat packer
 77350 Sausage makers

77360 Fish butchers
 77380 Meat cannery workers and other meat preservers (not sausages)
 77390 Other workers in meat preparation
 77400 Cannery workers and other food preservers
 77500 Butter, cheese and dairy product makers
 77610 Baker and confectioner
 77620 Bakers
 77630 Confectioners and pastry makers
 77640 Candy makers
 77650 Chocolate makers
 77690 Other baked goods makers
 77700 Tea, coffee and cocoa preparers
 77820 Brewers
 77830 Maltsters
 77840 Wine workers
 77850 Vinegar makers and workers
 77860 Distillers
 77870 Makers of soft drinks
 77880 Bottlers
 77890 Other drinks makers and workers
 77990 Other food and beverage processors
 78100 Tobacco preparers and tobacco factory workers
 78200 Cigar makers
 78300 Cigarette makers
 78400 Other tobacco product makers
 79120 Tailors and tailoresses
 79130 Dressmakers
 79190 Other garment makers
 79200 Furriers and fur workers
 79320 Milliners
 79330 Hat makers
 79340 Straw hat makers
 79390 Other hat makers
 79400 Glove makers and related workers
 79520 Seamstresses
 79530 Sewers and sewing machine operators
 79540 Embroiderers
 79590 Others hand sewers
 79620 Upholsterers (except vehicle)
 79630 Vehicle trimmers and upholsterers
 79640 Mattress makers
 79690 Others working in upholstery jobs
 79920 Sail, tent and awning makers
 79930 Umbrella makers
 79940 Artificial flower makers
 79990 Other cloth and related product manufacturing workers
 80100 Boot and shoe makers and repairers
 80200 Specialised occupations in the boot and shoe making industry
 80320 Saddlers and harness makers
 80330 Trunk or bag maker

80390 Other leather goods makers
 81120 Cabinet makers
 81130 Chair makers
 81140 Wicker furniture makers
 81190 Other furniture makers
 81210 Woodworkers
 81220 Sawyers, woodworking
 81230 Wood turners and handle makers
 81240 Wood planers
 81250 Wood carvers
 81290 Other woodworking machine operators
 81300 Coach, carriage and wagon makers
 81400 Wheelwrights and cartwrights
 81500 Coopers, hoop makers and benders
 81600 Clog makers
 81710 Box makers nfs
 81720 Wooden box makers
 81730 Paper box makers
 81790 Box makers nec
 81920 Wooden tool makers
 81930 Ski makers
 81990 Other makers of wooden products
 82000 Stone carvers or cutters and stone yard workers
 83120 Blacksmiths
 83130 Hammersmiths
 83140 Foregemen
 83150 Farriers or horseshoers
 83160 Specialised makers of forged metal products
 83190 Other blacksmiths, hammermen and forgeing-press operators
 83210 Tool makers nfs
 83220 Tool and die makers
 83230 Pattern makers nfs and nec
 83290 Other tool makers and metal markers
 83310 Metalworking machine operators
 83320 Metal Turners
 83390 Other metal working machine operators
 83400 Machinists
 83520 Metal polishers and finishers
 83530 Metal grinders and sharpeners
 83540 Cutlers and cutting instrument makers
 83550 Cutler (knives, forks, spoon)
 83590 Other metal grinders, polishers and tool sharpeners nec
 83600 Gunsmiths
 83700 Locksmiths
 83820 Saw makers
 83830 Saw, spade, shovel and half wood/half metal agricultural instrument type things
 83840 Chain makers
 83850 Nailer and nail makers
 83860 Wire makers

83890 Other metal workers nec
84110 Mechanics
84120 Millwrights
84130 Machine makers, builders and fitters
84140 Engine and locomotive builders
84150 Sewing machine makers and builders
84190 Other machinery fitters and machine assemblers
84220 Watch and clock makers
84230 Optical instrument makers and workers (not opticians)
84290 Other specialized instrument makers (not musical instrument makers)
84300 Bicycle makers
84900 Others in machinery
85100 Electrical fitters and electrical equipment assemblers
85500 Electricians and wiremen
85600 Telephone and telegraph installers
85700 Linesmen: telephone, telegraph and electric
85920 Electrical products inspector or tester
85990 Other electrical fitters and related electrical workers
87120 Plumbers
87130 Pipe fitters
87220 Welders
87230 Braziers
87250 Flamecutter
87290 Other welders, braziers, solderers
87320 Sheet metal worker, general
87330 Coppersmith or copperware maker
87340 Tinsmith, tinner or tinker
87350 Boilermaker
87390 Other sheet metal workers
87420 Structural metal workers
87430 Rivetters nec
87490 Other structural metal preparers and erectors
87520 Ship and boat builders
87530 Shipwrights and ship joiners
87540 Ship's carpenters
87550 Block, mast and tackle makers
87560 Caulker
87590 Other ship builders
88020 Jewellers
88030 Goldsmith
88040 Silversmith
88050 Working with gems and stones
88090 Other jewellery and precious metal workers
89120 Glass makers
89130 Glass bottle makers
89190 Other specific glass makers
89200 Pottery and porcelain makers and workers
89300 Brick and tile makers
89400 Glass engravers, etchers and finishers
89500 Pottery and porcelain painters

89620 Cement makers
 89630 Lime burners
 89700 Clay-based products makers
 90100 Rubber product makers
 90200 Tire makers and vulcanisers
 91020 Paper and paperboard products makers, except boxes
 91090 Other paper product makers
 91100 Paper and paper board product makers
 92000 Printers nec
 92110 Printers nfs
 92120 Compositors
 92190 Other compositors and typesetters
 92200 Lithographic printers
 92300 Stereotypers and electrotypers
 92400 Lithographers
 92500 Photo-engravers
 92600 Bookbinders and related workers
 92800 Textile printers
 92900 Other printers and related workers
 93110 Painters, nfs
 93120 Painters, construction
 93130 Painters, ship
 93190 Other specialised painters nec
 93200 Decorators
 93320 Lacquerers and enamellers
 93330 Japanners
 93400 Gilders
 94110 Musical instrument maker nfs
 94120 Piano maker
 94130 Piano tuner
 94140 Organ builder
 94190 Other musical instrument makers and tuner
 94220 Basket makers
 94230 Brush makers
 94240 Broom makers
 94290 Bristle and straw workers nec
 94300 Non-metallic mineral product makers
 94910 Other production or related worker, specialisation unknown
 94920 Animal stuffers, taxidermists and shell workers
 94930 Linoleum makers and floor cloth makers
 94940 Toy and doll makers
 94990 Production and related workers nec
 95110 Mason nfs or combined
 95120 Bricklayers
 95130 Stone masons
 95140 Plasterers
 95150 Paviours
 95160 Marble mason
 95190 Others in construction
 95200 Cement masons and finishers

95310 Roofer, specialisation unknown
 95320 Slate and tile roofers
 95330 Thatchers
 95390 Other roofers
 95410 Carpenter and joiner

comparability:

This variable is fully comparable across all data sets. The codes are the same as for the variable OCCHISCO in NAPP.

More information on HISCO is available in M.H.D. van Leeuwen, I. Maas and A. Miles. (2002) HISCO: Historical International Standard Classification of Occupations. Leuven: Leuven University Press.

occupational title (occupat)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable has the occupational title of the person as it has been transcribed from the original source. It is an alphabetic variable with 30 characters. If the information needs more than 30 characters, it will be truncated.

codes:

!! missing occupational title
** occupational title not included in data file
?? illegible occupational title

comparability:

This variable is fully comparable across all data sets. This variable has the same length as the variable OCCSTRNG in NAPP.

person identification number (id_pers)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable is the unique person identifier within the whole data collection. It consists of the person identification number within the respective data set and the dataset number. It is a numeric variable with 15 digits: 3 digits for the dataset number and 12 digits for the identification number within the respective data set.

codes:

No codes are used.

comparability:

This variable is fully comparable across all data sets.

person weight (perwt)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable indicates how many persons in the population are represented by a given person in the data set. It is necessary to apply this variable to produce accurate statistics for the "weighted" samples, specifically in those where the person records in the sample data represent differing numbers of persons in the population. Most of the data sets are not weighted, i.e. they have the weight "1". It is a numeric variable with 4 digits (2 decimal places).

codes:

No codes are used.

comparability:

This variable is fully comparable across all data sets. This variable has the same length as the variable PERWT of NAPP.

place code (place)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable identifies the place of enumeration of the person. It is based on the contemporary administrative units to which the place of enumeration belongs today.

It is a numeric variable with 15 digits. It consists of:

- the country code (3 digits),
- the LAU-2-code (9 digits),
- and a running number within the LAU-2-code for all villages belonging to the same LAU-2 (3 digits).

The LAU-2-code is provided by Eurostat. LAU-2 stands for Local administrative unit and was previously known as NUTS-5. It is the smallest administrative unit used by Eurostat and corresponds generally with the smallest locally governed areas (“Gemeinde”).

Belarus:

Instead of the LAU-2 code the postal code is used.

Greece:

The LAU-2 codes for the region Attika (NUTS-3: GR300) include an “A” which is replaced by “10” (e.g. A40801 for Kythira becomes 1040801).

Russia:

The place code consists of:

- the country code (3 digits),
- one zero (1 digit),
- the OKATO code (8 digits),
- and a running number within the OKATO code for all villages belonging to the same OKATO code.

An online search engine for the OKATO-code is available at:

http://www.mosclassific.ru/mClass/okato_view.php?text=

Switzerland:

The place code consists of:

- the country code (3 digits),
- the NUTS-3 code (3 digits, without CH),
- two zeros (2 digits),
- the Gemeindenummer (4 digits),
- and a running number within the Gemeindenummer for all villages belonging to the same Gemeinde (3 digits).

The Gemeindenummer is generally available in Wikipedia.

Ukraine:

The place code consists of:

- the country code (3 digits),
- the KOATUU code (10 digits),
- and a running number within the KOATUU code for all villages belonging to the same KOATUU code (2 digits).

comparability:

This variable is fully comparable across all data sets.

presence of person at enumeration (presence)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable has the information, whether the person was present at the enumeration or not. It is a numeric variable with 1 digit.

codes:

0	not recorded
1	present
2	absent
3	obviously dead
4	double entry
9	unknown

comparability:

This variable is fully comparable across all data sets.

quality flag age (qage)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable denotes whether the age differs from the age information in the enumeration. The reason for such a change is generally an incompatibility with other information about this person in the enumeration, as e.g.:

HEAD	50 years
WIFE	45 years
SON	50 years
DAUGHTER-IN-LAW	25 years

The information about the age of the son in this household is obviously wrong, therefore his age will be recoded into “unknown” and the variable qage will be changed from 0 to 1.

The second reason is an age above 125 years, which will be recoded to 125 years.

It is a numeric variable with 1 digit.

codes:

- 0 age not altered
- 1 age altered because of inconsistency with other characteristics
- 2 age altered because over 125 years

comparability:

This variable is fully comparable across all data sets. The codes of this variable are only partly compatible with the variable QAGEGB in NAPP.

quality flag household (qhhold)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable denotes whether the household borders differ from the information in the enumeration or whether the household has some specific characteristics. The reasons for such a change in household borders are that obviously erroneously a household was divided into two households (e.g. two military barracks with the same address), or that two households were combined into one household by omitting a household separator between them (e.g. same household number, but different addresses and two household heads).

It is a numeric variable with 1 digit.

codes:

- 0 household status not altered
- 1 household status altered: combining two or more households
- 2 household status altered: one household separated into more households
- 3 household with strange characteristics
- 5 incomplete household

comparability:

This variable is fully comparable across all data sets. The codes of this variable are not compatible with any variable in NAPP.

quality flag household relationship code (qrelate)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable denotes whether the code for the relationship to the head of the household differs from the term used in the enumeration. There are several reasons for such an alteration:

1. The term refers to the head of a family within the household or the previous person, but not to the household head.

HEAD

HIS WIFE

HIS SON

HIS WIFE

HIS DAUGHTER

will be coded as:

0101 head

0201 spouse

0301 child

0401 child-in-law

0901 grandchild

2. The term is obviously wrong.

HEAD 30 years

WIFE 30 years

SON 5 years

SON 50 years

DAUGHTER-IN-LAW 50 years

will be coded as:

0101 head

0201 spouse

0301 child

1061 other relative

1061 other relative

3. There was no person indicated as household head.

Every household has to have a household head (even group quarters). In case nobody was named household head in the source material, the first person of the household will be selected as household head (unless there is a clear indication of a possible head of a household being enumerated not as the first person, as e.g. the director of a hospital enumerated as second or third person) and all subsequent persons will be coded according to their relationship to this person.

4. There is a second household head enumerated.

There can only be one household head per household. The second one has to be recoded according to other information about this person. If there is a clear indication, that two households were erroneously merged into one, both stay household heads and the second gets a new household number together with all the members of this household. This change will be reported in the quality flag of the household (qhold).

5. The information of other persons in the household can be used to clarify the relationship to the household head.

HEAD	40 years
WIFE	25 years
WIDOW	50 years
BROTHER	15 years
MISSING	11 years
MISSING	8 years

will be codes as:	qrelate
0101 head	0
0201 spouse	0
0601 parent-in-law	5
0801 sibling-in-law	1
0801 sibling-in-law	5
0801 sibling-in-law	5

It is very likely that the children following the widow are her children and that the relationship "brother" refers to the wife of the head and not to the head. Therefore the widow should be the mother of the wife.

6. There are households or persons, which are enumerated as separate units, but it is obvious that they were actually part of a larger household (e.g. as a servant). If this larger household is known, the household identification number of this larger household will be used, if the larger household is unknown, a separate household identification number is used. Such households have no household head.

If code 1 and code 2 are possible for the same person, take code 1.

It is a numeric variable with 1 digit.

VariableCode	VariableLabels
0	relationship status not altered
1	relationship status altered because relationship refers not to household head
2	relationship status altered because it is obviously wrong
3	relationship status altered because no household head was enumerated
4	relationship status altered because of more than one household head
5	relationship status altered because of information from other members of the household
6	relationship status altered because person is a member of a larger household, but we don't know this household

comparability:

This variable is fully comparable across all data sets. The codes of this variable are only partly compatible with the variable QRELGB in NAPP.

quality flag marital status (qmarst)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable denotes whether the marital status variable differs from the marital status information in the enumeration. The reason for such a change is generally an incompatibility with other information about this person in the enumeration.

It is a numeric variable with 1 digit.

codes:

0 marital status not altered

1 marital status altered

comparability:

This variable is fully comparable across all data sets. The codes of this variable are compatible with the variable QMARSTGB in NAPP.

quality flag sex (qsex)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable denotes whether the sex variable differs from the sex information in the enumeration. The reason for such a change is generally an incompatibility with other information about this person in the enumeration. If both first name and relationship indicate a different gender to that in the sex variable, the sex variable is altered. If there is still a problem, i.e., the relationship is not gender specific (i.e., head) then the sex is altered in the following ways:

- For those people where the relationship to head of household is gender-specific, alter the sex if relationship and first name refer to a different sex than the sex variable. For those people where the relationship to head of household is gender-specific, alter the sex if relationship and first name refer to the same sex and the sex variable is unrecorded.

It is a numeric variable with 1 digit.

codes:

- 0 sex not altered
- 1 sex altered because relationship and first name imply different sex
- 2 sex altered on basis of first name only

comparability:

This variable is fully comparable across all data sets. The codes of this variable are only partly compatible with the variable QSEXGB in NAPP.

region (region)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable identifies a region covering the place of enumeration of the person. It is based on the historical administrative division at the time of enumeration. These region codes are not exclusive to each other, because the area covered by them can change over time. Therefore the same place can have two different region codes for two different enumerations.

It is a numeric variable with 6 digits. It consists of:

- the country code (3 digits),
- a larger region within the country (3 digits).

1303	foundlings/orphans
9993	the same as the previous entry
9994	numbered item (indicates being the same as the previous entry)
9995	not coded yet
9996	unclassifiable
9997	unknown
9998	illegible
9999	missing

comparability:

This variable is fully comparable across all data sets. It uses the same codes as the variable RELATE of NAPP (with the exception of the additional codes 605-608, 1141-1147, 1206-1207, 1209, 1218, 1225-1226, 1229, 9993 – 9995).

relationship to household head original (relateor)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable has the information about the relationship to the household head as it has been transcribed from the original source. It is an alphabetic variable with 45 characters. If the information needs more than 45 characters, it will be truncated.

codes:

- !! missing relationship to household head
- ** relationship to household head not included in data file
- ?? illegible relationship to household head

comparability:

This variable is fully comparable across all data sets.

religion (relig)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable has the religion of the person. It is a numeric variable with 4 digits.

codes:

0000	not recorded
1000	no religion
1001	Atheist
1002	Without religion
2000	Buddhist
3000	Hindu
4000	Jewish
5000	Muslim
6000	Christian
6100	Catholic
6110	Roman Catholic
6120	Greek Catholic
6200	Orthodox
6210	Old Believer
6300	Protestant
6310	Lutheran
6320	Anglican
6330	Reformed
6340	Pentecostal
6350	Adventist/Seventh-day adventist
6400	other Christian
7000	Other
7001	Bahai
7002	Sikh
9999	unknown

comparability:

This variable is fully comparable across all data sets. These codes are inspired by NAPP and IPUMS-International, but not identical with the codes RELIG or RELIGION.

sex (sex)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable has the sex of the person. It is a numeric variable with 1 digit.

This information is partly not stated explicitly in the source, but derived from other information, like relationship to the head of household or first names.

codes:

- 1 male
- 2 female
- 8 illegible
- 9 missing/blank

comparability:

This variable is fully comparable across all data sets. The codes are the same as for the variable SEX in NAPP. The codes are the same as for the variable SEX in IPUMS-International with the exception of code 8, which does not exist there.

type of enumeration (enumtype)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable identifies the type of enumeration of the record.

It is a numeric variable with 2 digits. The first digit indicates the group of enumeration:

10 – 19: census listings

20 – 29: church listings

30 – 39: tax lists

40 – 49: other enumerations

codes:

10 census (unknown whether de jure or de facto)

11 de jure census

12 de facto census

13 ancient census

21 status animarum

22 list of communicants

23 confessional list

24 soul register

31 head tax list

32 revision list

33 other tax list

41 list of inhabitants

42 conscription list

43 household register

44 list of slaves

99 unknown

Note: De jure census includes also enumerations which were published as de facto censuses in case the enumeration includes also data about absent people and a question about the presence or absence of people.

comparability:

This variable is fully comparable across all data sets.

urban-rural status (urban)

availability:

This variable is available for all data sets.

universe:

This variable is available for all persons.

description:

This variable identifies the enumeration place as being urban or rural. It is a numeric variable with 1 digit.

codes:

- 1 rural
- 2 urban
