

Cleaner Production Letters

Cleaner Production Letters (CLPL, ISSN: 2666-7916) is an international, inter-, multi- and transdisciplinary journal focusing on Cleaner Production, Environmental, and Sustainability research and practice. CLPL is committed to publish top-tier original research from the cleaner production community and to serve as a platform for communications in addressing and discussing emerging topics with potential of high societal impact and great significance.

The papers published in CLPL will provide a deeper understanding of new and innovative technological, human, and institutional strategies, approaches, methods, models and cases, in cleaner production and sustainability issues, addressing Sustainable Development Goals (SDGs).

CLPL particularly welcomes the following types of articles: (1) *original research articles*: emerging and disruptive topics in cleaner production and sustainability that address present and future societal challenges; (2) *review articles*: high quality *reviews* that consolidate and shape a fast-developing area; (3) *short communications* to the editors: short articles reflecting about a novel or priority issue; discussion articles addressing relevant questions, comments and inputs to other published articles; viewpoint and critical perspective articles.
