

## Invitation to virtual DK Guest Lecture

# Climate-change impact and policy: modelling and key findings

**Prof. Francesco Bosello**

University of Milan, Department of Environmental Science and Policy

**Thursday, 4 June 2020 | 12:00 to 13:30**

**Online lecture and discussion**

### **Abstract**

The lecture aims to introduce the main challenges for and methodologies used by the economic discipline in the assessment of climate change impacts and policy (integrated assessment modelling, econometrics, semi quantitative approaches). It will present the main findings from the economic impact literature, offering a comparison across the different methods. It will then introduce a discussion on the cost of climate change mitigation and adaptation policies, to finally derive some general conclusions.
