

## ***Alumni statements about the Programme***

### **Johann Koinegg, MSc**

Project Manager, Green Tech Cluster Styria GmbH

*“The interdisciplinarity offered in this master program is a great chance. This gave me a broad view into various subjects crucial to understand the complexity of sustainability as a whole. On the other hand, it is essential to focus on one’s personal special interest, which I did in my master thesis working out insights about building integrated photovoltaic as an entrance into the PV-Industry at that time. A special highlight is the international perspective of the program immanent to a Joint Degree, both, with incoming exchange students and the mobility semester.”*

**Entrance University:** University of Graz (graduated 2012)

**Mobility Track:** Sustainable Development – Science and Technology, Hiroshima University
