

Climate change and the role of interdisciplinarity within the functional method of comparative law

KEY COMPONENTS OF RESEARCH

1. Interdisciplinarity of climate change
2. Definition and delimitation of climate law
3. Functional method of comparative research methodology
4. Suitability of applying the functional method of comparative research within the climate law context

KEY OBSERVATIONS OF RESEARCH

1. Demarcation of interdisciplinarity, transdisciplinarity and multidisciplinarity
2. Location of national climate law within the international legal climate change regime
3. Comparative research methods: functional, structural, analytical, law-in-context, historical and common-core
4. Functional method of comparative research as a suitable method to compare climate law
