## There is no planet B!

We have to act now in order to limit global warming to 1.5°C. AEMS focuses on ways to restructure economic systems to embody sustainable use of resources and a more collaborative society overall.

At AEMS you learn about:

**Ecological sustainability**, population growth and the long-term management of natural resources and energy.

**The variety** of alternative economic and monetary systems that are already in practice worldwide.

**Business ethics**, consumerism, solidarity and the common good: The need for a new philosophy.

## ORGANIZERS

**BOKU University of Natural Resources and Life Sciences** contributes to a sustainable use of natural resources by connecting natural sciences, engineering and economic sciences.

**Economy for the Common Good** offers an answer to current ecological, social and economic problems. As of 2021, more than 3,900 members have committed themselves to the initiative.

Each year, **OeAD student housing** accommodates over 2,500 students in energy-efficient dormitories. It also won the 2013 Austrian Climate Protection Award.
