

Barriers and Challenges of No and Low Code Platforms for AI

➤ Problem setting

No and Low code platforms for AI development are the next step in organizational AI strategies. However, adoption barriers are reported as well as challenges for scaling of this technology. Building on an analysis of barriers and challenges at Siemens Energy, a strategy for introducing and scaling of No and Low Code platforms should be developed and evaluated.

➤ Task description

- Literature research on no and low code platforms for AI
- Identification of barriers and challenges
- Development of a scaling strategy for introducing such platforms in organizations

➤ Supervision

- Supervisor: Univ.-Prof. Dr. Stefan Thalmann
- Tim Keßler and Benjamin Gigerl (Siemens Energy)
