# WiFi access in Windows 10

## Requirements

- Active account in UNIGRAZonline
- WLAN-enabled device e.g. notebook or smartphone
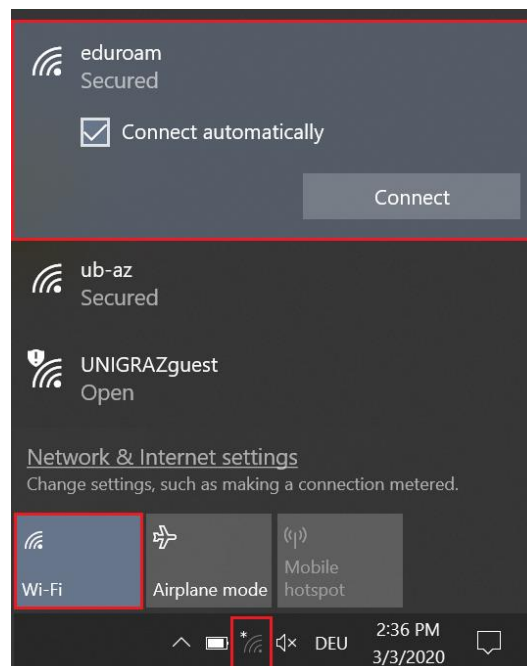

**Note for "Outgoings" of Graz University:**

If you use the following settings you will be automatically logged into the WLAN of most other eduroam partner organizations (e.g. other universities that also offer eduroam).
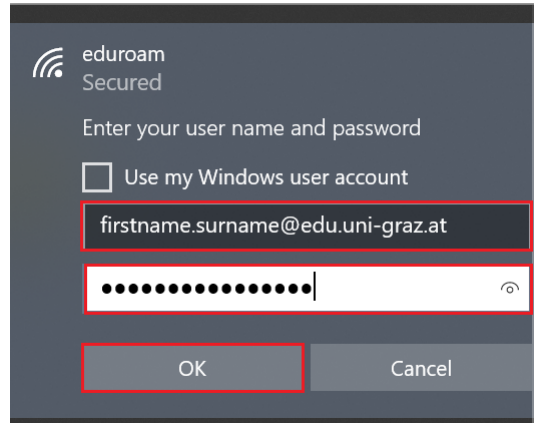

Informations about „**eduroam**":

http://www.eduroam.at or www.eduroam.org

## Connect "eduroam" network

1. On the *Home screen*, in the *taskbar*, click the *Network Settings* icon.
2. Select the network **eduroam** and click on *Connect*. If you want to connect to the network automatically in the future, check Automatically connect.

3. Enter your *login data* in the following format and click OK.
   - o Username: **Your Uni Graz e-mail address**
   - o Password: **Your current UNIGRAZonline password**

4. You will then be asked if you want to *connect* **eduroam**. Click *Connect* again to complete the setup.
5. You should now be successfully connected to the "eduroam" network
